Create an HTML page name base.html

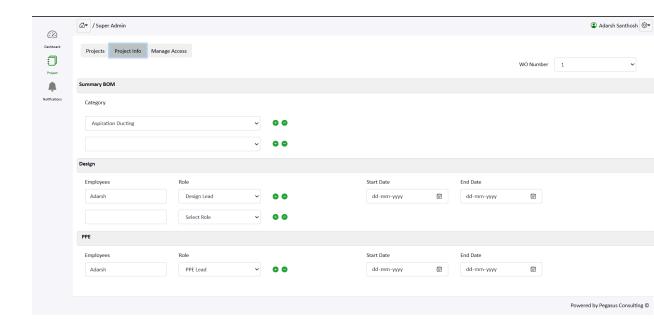

Side menu bar is collapse (using bootstrap)

- The page contain three button

- Project

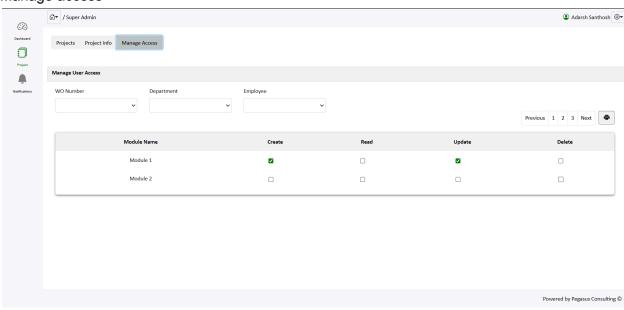

- Project info

In this page all session have two green button one + and -

- While click on the + button add one more row in the session Eg: while click on the category session + button add one more row add on the category sessions
- While click on the button then remove the row from the corresponding session
- Manage access

Note:Based on your creativity, develop the page incorporating all our requirements. Ensure all dropdown boxes include a search functionality.
